

MEASUREMENT RESULTS: WATER COVERED WITH JT COVER

Contractee:

JT Cover
Vilhelmsborgvej 8C
7700 Thisted
Denmark

Testing Institute and Testing Site:

Institut für Boden und Umwelt
LUFA Nord-West
Jägerstr. 23-27
26121 Oldenburg
Germany

Measurement period: 23.5.2018 – 18.9.2018
Project number: 20180403-1565

The tests were carried out to measure the evaporation rate and the reduction of algae growth on water covered with JT Cover.

Measurement result evaporation: JT Cover reduces evaporation with **63,6 %**.

Measurement result algae growth: JT Cover prevents algae growth with **more than 99 %**.

Reduction rates - results:

Reduction rate 1: 99,4 %

Reduction rate 2: 99,6 %

Reduction rate 3: 99,1 %
